SKINPECCABLE

Brentwood's newest medi-spa, which is next door to and affiliated with Concierge Medical, offers

a basic facial with incredible results. The aptly named "Impeccable Facial" starts with a microdermabrasion treatment, followed by a moisturizing treatment with a unique serum delivery system that uses electricity to infuse a potent vitamin-packed serum into the skin. A negatively charged pad is placed on the client's back and a series of positively charged pads are placed on the face to help penetrate the serum deep into the skin's layers. Another feature of this facial is their unique alternative to a steaming machine. Instead, hot cloths are wrapped around the face, and then the face is sealed into a leather cone-shaped device that traps the moisture inside. The results aren't immediate, but several days after this intensive moisturizing treatment, the skin glows, clear and free of impurities, for results that last and last.
